

May 1, 2000

Dear Commissioner Jane Henney!

6046 '00 MAY -9 P2:16

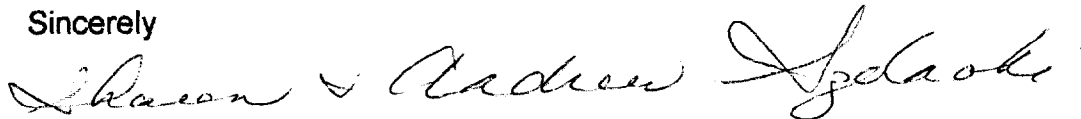

We are writing to you as concerned constituents regarding the use of genetically engineered foods. We are asking that all GE foods be tested and labeled accordingly. We would like to see a moratorium imposed on all new GE foods until they are proven safe.

Our concerns regarding these foods are:

1. The possibility of creating antibiotic resistance, allergic reactions as well as other dietary and health risks for all of us.
2. There is implication that GE foods are a significant threat to the environment.
3. Un-engineered plants are put at risk by genetic drift.

All products sold in Europe that may contain GE material must be labeled as such. We deserve the same protection from our government. We urge you not to listen to the well-financed rhetoric of Agri-business.

Sincerely

Sharon and Andrew Szolnoki
